THE MYSTERIOUS CASTLE

Golden Castle is a 6x6 TITANWAYS™ video slot, taking place in the haunted remains of a gilded castle.

This game marks the debut of Fantasma Games' new TITANWAYS™ feature which is a brand new ways evaluation system that intermingles oversized symbols on the reel creating varying amounts of TITANWAYS™ and volatility each spin.

The game also features avalanche and the "Wild Haunt Feature" in which the Ghost King of the castle will break apart oversized symbols and transform them into wild reflections of himself.

Golden Castle also features a re-triggerable Free Spin mode with a growing multiplier that increases by x1 for each win.

TITANWAYS

Regular symbols can appear in 5 different sizes: 1x1, 1x2, 1x3, 2x2 and 3x3. A symbol's height has no impact on its value.

1x1, 1x2 and 1x3 symbols are evaluated as 1 symbol.

2x2 and 3x3 symbols are evaluated as 1 symbol on each individual reel they cover.

A TITANWAYS™ Win occurs when 3 or more identical symbols land on consecutive reels from the leftmost to right.

All wins pay left to right.

The win is multiplied by the number of winning symbols per reel according to the Paytable and by the Multiplier (if any).

WILD HAUNT FEATURE

The Wild Haunt Feature is activated for each Ghost King symbol landing on the reels.

The Wild Haunt Feature randomly selects one non-1x1 symbol and disassembles it into multiple 1x1 symbols of the same kind.

Each 1x1 symbol the Wild Haunt Feature creates also may be randomly upgraded to a Wild symbol.

PHANTOM FREE SPINS

Collecting 3 Bonus symbols in a Base Game round activates 10 Phantom Free Spins.

In the Phantom Free Spins, there is a win Multiplier that starts at x1 and is increased by 1 after each Avalanche.
